

Setup instructions for the Mozilla Firefox browser for use with CMTS

1. Navigate to: <http://cmt.grc.nasa.gov/ContentManagement>
(it is important to use http, and NOT https)
2. Click the Continue button on the warning message. If you wish to not see this message again, click on the checkbox labeled "Remember my decision".

3. After a 3 second countdown, you will be prompted to install the Aras Firefox Extension. Click on the Install button.

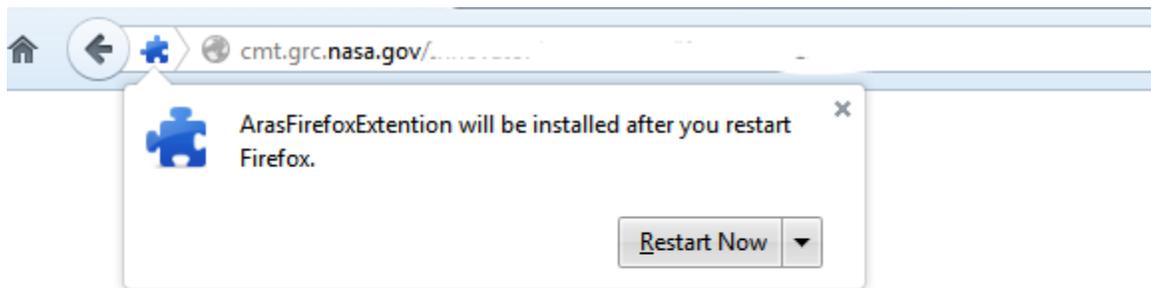

Aras Innovator client has failed to initialize.

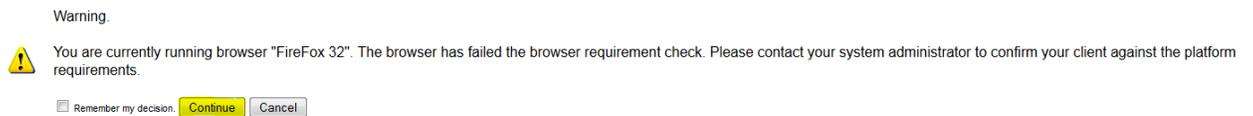

Please install Aras FireFox Extension to work with Innovator.

4. You should receive a notification noting the extension will be installed upon restart. Restart your Firefox browser as instructed.

5. After restarting Firefox, navigate to <https://cmt.grc.nasa.gov/ContentManagement>
6. You will receive the same warning as in step 2, click Continue.

7. Enter your CMTS login information and click on the Login button.
